

FINNTALC M50

Functional Extender

GENERAL INFORMATION

FINNTALC M50 is a hydrated magnesium silicate with chemical formula of $\text{Mg}_3\text{Si}_4\text{O}_{10}(\text{OH})_2$.

Finntalc grades are purified in a cascade of multiple flotation cells. This process results in a tight definition of the talc composition, making this natural product similar to a synthetic chemical. In combination with a precisely controlled particle size distribution, this ensures exact reproducibility in formulations.

APPLICATIONS

- Paints & Coatings: High solids and high PVC heavy duty protective coatings with dry film thickness of $> 150 \mu\text{m}$, matting dead-matt wall paints.

KEY PROPERTIES

- Pure, lamellar, coarse particle size talc with reduced oil absorption value, stable colour, very hydrophobic, inert and soft.

INCORPORATION

FINNTALC M50 can be used as a functional extender to achieve following results:

Good barrier and good anti-corrosion properties at low VOC levels of highly filled protective coatings, good adhesion and sandability, matting of dead-matt paints.

LEVELS OF USE

Typical use levels for paints and coatings applications are 5 - 40 % depending upon the application and the desired properties.

HEALTH AND SAFETY

Before using this product please consult our Safety Data Sheet (SDS) for information on safe handling and storage. The SDS can be found on the company website.

STORAGE RECOMMENDATIONS

Store dry.

SHELF LIFE

FINNTALC M50 has a shelf life of 5 (five) years from the date of manufacture.

QUALITY ASSURANCE

Since 1992 the company is a holder of the ISO 9001 certificate, which guarantees that all operations are conducted according to the stipulated standards.
